

# GABBIANO SUPER

Folding frame (up to 280 HP)

## Mid-range, high performance: making things standard for folding models

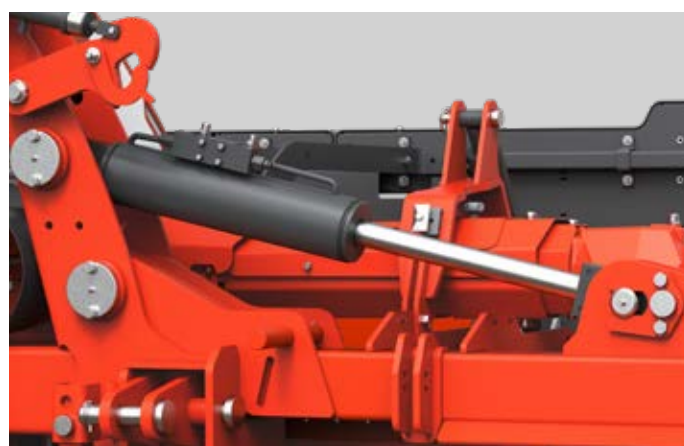

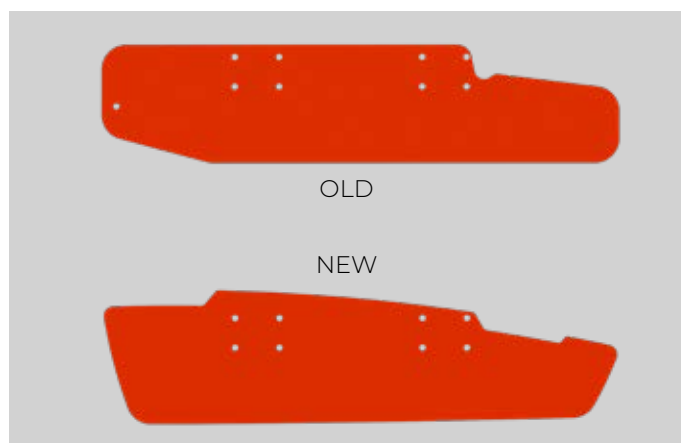

GABBIANO SUPER is the mid-range rotary harrow in the folding frame lineup. It combines the robustness of the HEAVY DUTY philosophy found in higher-end models with the compactness and maneuverability of lighter versions. The oversize leveling bar—others enhances soil refinement, alongside proven components like hardened and tempered gears, hardened blade support shafts, and HEAVY DUTY bearings—the required operating range is between 120 and 280 HP.

### Side protection guards

The side protection guards shape allow for increased soil retention, helping to achieve an ideal seedbed across the entire working width also increased durability.

### UP FLOATING system

Like the FALCO SUPER, GABBIANO SUPER is equipped with the floating system, which allows the two frame wings to move upward and follow the ground profile (negative inclination is featured in larger models such as TORO SUPER and JUMBO SUPER). This ensures excellent soil refinement in all soil types and working conditions.

### Standard gear pair for side-speed gearbox

The side speed reducers allow the rotor RPM to be adjusted based on soil type and desired refinement level.

Standard gear pair: 17-23 (PTO speed: 1000 RPM – Rotor speed: 357 RPM).

	GABBIANO SUPER
MODEL	4.000 - 4.600 - 5.000 - 6.000
Working width (m)	4 - 4,6 - 5 - 6
Hitch category (type)	II <sup>^</sup> - III <sup>^</sup>
Tractor power (HP)	120 - 280
PTO (rpm)	1.000
Blades (n°)	32 - 36 - 40 - 48
Working depth (cm)	26
Stone deflector	optional
Hydraulic roller adjustment	optional
Weight* (kg)	2.350 - 2.400 - 2.640 - 3.080

\*Weight indicated with Ø 450mm CAGE roller
